**HOW to MEASURE for BollardGard™ Covers**

- Measure the Outside Diameter of Pipe
- Use the reference above to determine if you need a 4", 7", 8" or 11" BollardGard

Note: This document is intended to be printed at 100% Scale to assist in measuring (Diagram is at 100% Scale).
BollardGard™ Easy Installation
Our Patented Gripper Tabs™ installation method is the fastest and most secure in the industry.

1. Adhere three or four self-adhesive Gripper Tabs evenly spaced around the top and base of the steel bollard with “gripper fingers” pointing down.
   (Use four Gripper Tabs at the top and base when filling larger spaces.)

2. Place the BollardGard cover over the steel bollard. Gripper Tabs should provide a tight fit between the bollard and cover, which cannot be easily removed.
